6 “SERVE Act”.

7 **SEC. 2. FINDINGS.**

8 Congress finds the following:

1 (1) Eating disorders affect approximately
2 30,000,000 Americans, including individuals from
3 every age, gender, body size, race, and socioeconomic
4 status.

5 (2) Eating disorders include anorexia nervosa,

7 strictive intake disorder, and other specified feeding
8 or eating disorders.

9 (3) Eating disorders result in the highest mor-
10 tality rate of any psychiatric illness, and the suicide
11 rate for individuals with such disorders is 23 percent
12 higher than the suicide rate for the general popu-
13 lation.

14 (4) Research demonstrates that—

15 (A) eating disorders often co-occur with
16 complex medical conditions, mental illnesses,
17 and substance use disorders; and

18 (B) up to 35 percent of individuals with a
19 substance use disorder have a co-occurring eat-
20 ing disorder.

21 (5) Studies indicate that there is a higher prev-
22 alence of eating disorders among members of the
23 Armed Forces and veterans than among the general
24 population.

1 (6) Family members of members of the Armed
2 Forces have a higher prevalence of eating disorders
3 than the general population, with 20 percent of chil-
4 dren of members of the Armed Forces found at risk
5 of developing an eating disorder.

6 (7) Research has found a significant relation-
7 ship between eating disorders and members of the
8 Armed Forces and veterans with a history of post-
9 traumatic stress and sexual trauma.

10 (8) Female members of the Armed Forces have
11 a particularly high risk for an eating disorder, as
12 studies have found that 16 percent of such members
13 have an eating disorder and 34 percent of such
14 members are at risk of developing an eating dis-
15 order.
